

► Çıkış Kutusu Montaj Şekli

1 Kutu montaj edilirken çıkış kutusunun alt giriş kısmındaki kancaya dikkat ederek gövdeye montaj ediniz.

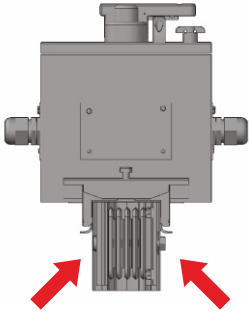

2 Çıkış kutusu üstten bastırılarak busbar'a oturması sağlanır.

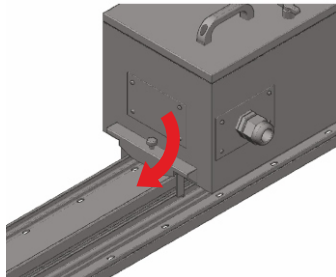

3 Çıkış kutusunun busbar gövdesine kanca sistemi yardımıyla takılmasını kontrol ediniz.

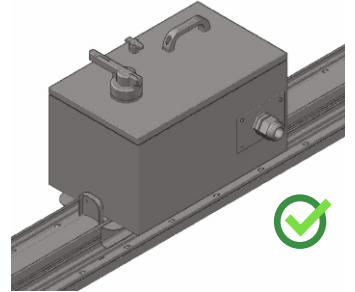

6 Çıkış Kutusu özel mekanizma yoluyla devreye alınız. Mekanizma (OFF) da iken Kapak kapatılır (ON) konumunda iken enerji verilir.

4 Kutusunun busbar gövdesine kelepçe sistemi yardımıyla vidalanarak montajı sağlanır.

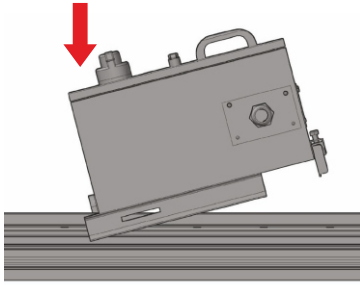

5 Kelepçe sıkılarak gövdeye sabitlenir.

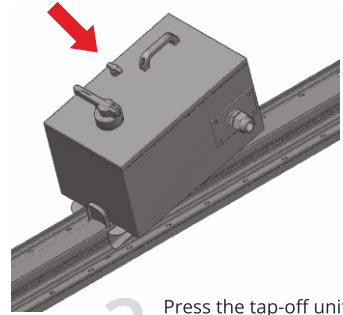

NOT: Emniyet nedeniyle (ON) onumunda kutu kapağı mekanizma nedeniyle açılmasını engellenir.

▶ Tap-Off Unit Installation

1 Attach the tap-off unit to the housing, paying attention to the hook on the bottom opening of the tap-off unit.

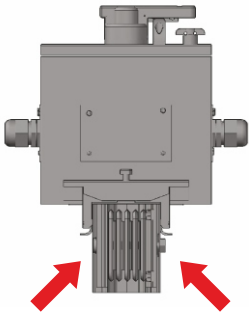

2 Press the tap-off unit down so that it fits into the busbar.

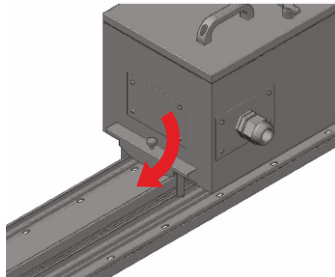

3 Check to see if the tap-off unit is hooked up to the busbar housing.

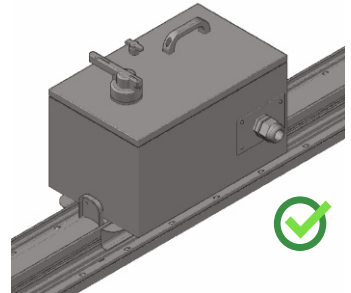

6 Turn on the tap-off unit by means of the special mechanism. Cover the tap-off unit when the mechanism is OFF and power up when it is ON.

4 Screw the tap-off unit onto the busbar housing with the help of the clamping system.

5 Tighten the clamp to fix the unit on the housing.

NOTE: For safety reasons, when the mechanism is ON, the tap-off unit cannot be uncovered.
